

WHY GPO MIGRATOR?

Transfer Group Policy settings with a few clicks of the mouse!

SDM Software's GPO Migrator simplifies the process of cleaning up, consolidating and reorganizing your Group Policy environment. Finally, you have the ability to pick settings out of GPOs or Reporting Pak snapshots and move them to other GPOs as needed, with just a few clicks of the mouse. You can also run RSOP against a computer and migrate those settings into a new GPO.

GPO Migrator does the hard work for you. All you have to do is select the source and destination GPO settings, specify the supported policy areas or settings you want to migrate, and click. Your new or existing GPO now has the settings of your source GPO.

BENEFITS

- Allows quick and easy movement of GPO settings from one GPO to another
- Simplifies Group Policy consolidation and cleanup projects
- Supports the most popular GPO areas (e.g. Administrative Templates, Security Settings, Drive and Printer Mappings many GP Preferences areas and more)
- Displays setting values of source GPO for quick checking
- Provides full logging of all migration activities
- Supports using GP Reporting Pak snapshots as a source for migration.

FEATURES

- GPO to GPO migration
- GP Reporting Pak snapshot to GPO migration
- RSOP to GPO migration
- Overwrite settings of existing GPO
- Leave settings of existing GPO in place
- Create a backup of existing GPO before migration
- Migrate all settings or just those you select
- Supports all OS versions from Windows 10 to Server 2022
