

SDM Software for Group Policy and Intune configuration management

SDM Software has been focusing on configuration management for 20 years. We offer role-based change control across both Group Policy and Intune, helping you maintain a predictable, resilient configuration state. For even more robust governance, our products can bring real-time auditing, settings-level visibility and analysis, as well as actionable health and processing insights.

Functionality	SDM Software Change Manager for GP and Intune 2.0	Microsoft AGPM
Next Product Release	2026	Retired in April 2026
